Financial & Liquidity Report - Supermarket HQ

Date: Current Month

LIQUIDITY WARNING:

Our cash flow and liquidity this month are extremely tight due to recent store expansions.

PROFITABILITY IMPACT OF INVENTORY WASTE:

Any waste in perishable goods (especially high-volume dairy products) will severely impact our net margins. If the 5000 units of yogurt expire, we will face a direct loss of 6,000 OMR (Purchase cost), which represents 15% of our monthly net profit.

FINANCIAL AGENT RECOMMENDATION:

We must accept a lower margin to clear the stock. A discount of up to 40% on selling price is financially viable and better than a 100% loss due to expiry. Implement clearance pricing immediately.
